

## Czech Technology Platform on Smart Grid — <http://www.smartgridcz.eu/>

Czech Technology Platform on Smart Grid was founded as an association of legal entities in September 2009, on the initiative of local companies operating in the energy sector in order to foster innovation energy systems in the Czech Republic by introducing the concept of Smart Grid and actively contribute to the creation of the optimum form for the Czech Republic. Among the ten founding members of the association include the company AIS Ltd., EG Expert Ltd. EGU Praha Engineering, Inc., Landis + Gyr Ltd., Unicorn, Inc., SOS Industry Ltd., NEUREG Ltd., University of West Bohemia in Pilsen. The Association is open to all companies and institutions that operate in the energy and want to participate in the creation of the concept of smart grids.
